

Bilayers at the ILL

Thursday, 12 December 2019

Session D - Chadwick Amphitheatre (11:00 - 12:30)

time	[id] title	presenter
11:00	[33] The rich phenomenology of glycolipids and membrane-anchored polysaccharides - Insights from scattering techniques and complementary computer simulations	SCHNECK, Emanuel
11:30	[8] Using suspended bilayers as a novel bacterial membrane mimetic for investigating mechanosensitive ion channels with neutron reflectivity	TITMUSS, Simon
11:50	[20] Mucin thin layers on top of model membranes as a model environment for mucosal delivery	RONDELLI, Valeria
12:10	[10] Oxidation of saturated and unsaturated bilayers by reactive oxygen species	KING, Martin
