

A tribute to Isabelle Grillo

Contribution ID: 104

Type: Invited speaker

Galenic-on-chip, Emulsions and micelles along the flow

Thursday, 19 May 2022 14:00 (30 minutes)

Isabelle was deeply fascinated by the beauty of many simple things, including unspoiled natural landscapes and the beauty of the self-assembly of amphiphilic molecules. To honor her memory and send her a wink, I will tell you a short light-hearted story where these two passions once met.

But before that, I would like to share with you some recent results that illustrate how self-assembly and scattering experiments, two domains where her contribution is outstanding, can contribute to new routes to produce and test nanomedicine.
