Ingenuity for life

NICOLAS LAMMENS | SIEMENS DIGITAL INDUSTRIES SOFTWARE

Nicolas Lammens is currently a Research Engineer in the Additive Manufacturing RTD team of Siemens Digital Industries Software, where his main activities are focused towards development of AM-enhanced fatigue predictions. In its efforts to advance the state-of-the-art and deliver industry-ready solution to its partners, Siemens Digital Industries Software fosters strong national and international collaborations with academia.

Prior to joining Siemens, Nicolas held a post-doctoral position at Ghent University, investigating AM polymer fatigue for bio-medical applications subsequent to obtaining a PhD degree in materials science for research on optical fiber sensing for structural health monitoring..
