Lecture 4: Hierarchical structures in food. Soft matter structure at various length scales

Wednesday, 5 July 2023 10:45 (1h 30m)

Food is characterized by complex hierarchical structures, interconnected over multiple length scales. A mechanistic understanding requires soft matter studies using molecular as well as colloidal soft matter tools. This lecture will bring some examples of how advanced physical techniques can help tackle important research questions, often using complementary methodologies.

Presenter: Prof. CORREDIG, Milena
