Lecture 6: Liquid foams: from the formulation to the characterization techniques

Thursday, 6 July 2023 09:00 (1h 30m)

In this lecture, we will introduce the basics of liquid foams: from the formulation, the generation and the characterization methods. At the end, we will illustrate how liquid foams can be used for a wide range of applications, not only as food or cosmetic products, but also for surface decontamination and in medicine due to their unique properties (rheological properties and imbibition).

Presenter: Prof. FAMEAU, Anne-Laure
