## Environmental Sustainability Landscape at ISIS and Implications on Engineering and Instrument Design

*Tuesday, 21 October 2025 12:05 (20 minutes)*

In the last 2-3 years the Environmental Sustainability policy, targets and governance that ISIS works within have started to change. Our Environmental Sustainability policy is increasingly focused on meeting the demands of the climate crises, and as such has taken on a new intensity and flavour. This talk will outline these policy changes, further changes that are expected, and discuss the implications on engineering and instrument design at ISIS
