European Spallation Source Technical Update

Tuesday, 21 October 2025 11:25 (20 minutes)

The European Spallation Source is preparing for initial Beam on Target, with the current planning indicating Q1 of 2026. This talk will present the technical status of the accelerator, target, controls, instruments and some of the remaining technical challenges. It will also discuss the organizational readiness as the organization prepares to shift from delivering a project into a functional facility.
